

JONGLAGE & PERCUSSION SHOWS

ZweiLight –Light juggling and LED drum show

"Pictures for the ears, music for the eyes!"

Light and logo juggling joined with modern drum beats – this lively fusion of percussion and high-tech light performance captivates every audience it encounters.

Our light-juggling and percussion show combines powerful electronic percussion sounds with juggling choreographies, all very unique in style.

Our distinctive light effects take into consideration your business colors as the light-juggler swirls your logo and slogans into the air.

Our artists create pictures and sounds that reflect the urban styles of today's European nightclubs' subculture. In this show the artists use computer-based juggling probs and glowing electronic drums to create unmatched visuals and sounds that are unique to our high end equipment and professional commitment.

The show can be customized for various short sequences or as a package in combination with our other shows such as *MarchingLights* and *PercuLights*.

Duration: 5min – 15min
